WOOD SPECIES AND CHARACTERISTICS

ALDER

CHERRY

HICKORY

MAPLE

OAK

When you choose your new kitchen or bath cabinetry, please keep in mind that no two pieces of wood are exactly the same. Stains are likely to exaggerate the difference between open and closed grains and other markings in wood. Grain variation and color change should be expected. As hardwood ages, it will darken when exposed to different types of light. Color differences or changes in wood can also be caused by exposure to harsh chemicals, extreme heat or moisture. Additionally, wood species exhibit other defining characteristics, such as mineral deposits/streaks, knots, sap runs, pin holes and wormholes. These markings make the wood unique and contribute to its enduring beauty.

Alder has a straight fine textured grain similar to Cherry and Maple. Although classified as a hardwood, it is moderately light in weight and considerably softer than other species. Therefore, care must be taken as it will dent and mar easily. Alder may exhibit grain and color variations, sapwood can be distinguishable from the heartwood, tight pin knots are sometimes present.

Cherry is characterized by its red undertones, but may vary in color from white to a deep, rich brown.

Cherry is a close-grained wood with fairly uniform texture, revealing pin knots and curly graining. All wood will age with time and the finish will darken. This is especially true for Cherry. This is a sought-after quality in Cherry cabinetry, and those who select it expect this evolution.

Hickory is a strong, heavy hardwood known for distinctive graining patterns. Contributing to its dramatic appearance is a wide variation in color and streaking, ranging from white to dark brown. This contrast in color can appear in a single door panel. Hickory also contains random knots and wormholes that further contribute to a varied appearance. These exaggerated characteristics are to be expected and are considered desirable in Hickory cabinetry.

Maple is a close-grained hardwood that is predominately white to creamy-white in color, with occasional reddish-brown tones. While Maple typically features uniform graining as compared to other wood species, characteristic markings may include fine brown lines, wavy or curly graining, bird pecks and mineral streaks. These traits are natural and serve to enhance Maple's natural beauty.

Oak is a strong, open-grained hardwood that ranges in color from white to pink and reddish tones. Streaks of green, yellow and even black may appear due to mineral deposits. Oak may also contain wormholes and wild, varying grain patterns. This distinct graining is considered a desirable quality.

OUR PROCESS TO CREATE A FINE FURNITURE FINISH

1. Wood Selection

The first step to select the finest wood for the component parts to ensure that they meet our high standards. High quality raw materials are the basis for a fine furniture finished product.

2. Sanded to Perfection

All the doors are sanded to assure that all parts of the wood will take the finish uniformly and evenly assuring consistent color .

3. Cleaning

Each part is cleaned of dust and debris prior to entering the stain booth on a wood surface that is free of dust particles.

4. Staining/Painting

The penetrating stain or paint is hand applied utilizing processes to make sure that the color is uniformly distributed.

5. Color Inspection

The stained or painted product goes through a color inspection station to assure that all parts of the kitchen will be uniform in color.

6. Drying

The product is then oven dried to ensure all parts are fully dry prior to sealing.

7. Sealer Coat

The seal coat provides a base for the top coat by filling in any open pores in the wood, allowing the top coat to go on uniformly and evenly.

8. Drying

The seal coat is oven cured for uniform hardness and drying.

This prevents finish problems like crackling and peeling.

9. Hand Sanded

The parts are lightly touch sanded with a fine grit sandpaper to prevent any raised grain or roughness.

This allows for a more uniform build up in the top coat.

10. Dust Removal

After sanding the parts are cleaned of any debris. This ensures no dust is in the top coat.

11. Top Coat

A premium quality catalyzed clear top-coat is applied to protect the wood from environmental elements.

12. Drying

The top coat is oven cured. This chemically locks in the properties of the top coat finalizing the finish quality .

13. Final Inspection

All product goes through a final inspection in the finish area assuring consistent color and finish quality .

Additional Finish Steps for Glazed Product

1. After the seal sanding and cleaning the glaze is hand applied.
2. The glazed product is placed on a rack to air dry.
3. The product then goes through the top coat, drying and inspection steps.

- 1. Door/Entry:** A doorway should be at least 32 inches wide.
- 2. Door Interference:** No entry door should interfere with appliances, nor should appliance doors interfere with one another.
- 3. Distance Between Work Centers:** In a kitchen with three work centers*, the sum of the distances between them should total no more than 26 feet. No leg of the work triangle should measure less than 4 feet nor more than 9 feet. When the kitchen includes additional work centers, each additional distance should measure no less than 4 feet nor more than 9 feet. No work triangle leg should intersect an island or peninsula by more than 12 inches.
* The distances between the three primary work centers (cooking, cleanup/prep and refrigeration) form a **work triangle**.
- 4. Separating Work Centers:** A full-height, full-depth, tall obstacle [i.e., a pantry cabinet or refrigerator] should not separate two primary work centers.
- 5. Work Triangle Traffic:** No major traffic patterns should cross through the work triangle.
- 6. Work Aisle:** The width of a work aisle should be at least 42 inches for one cook and at least 48 inches for multiple cooks.
- 7. Walkway:** The width of a walkway should be at least 36 inches.
- 8. Traffic Clearance at Seating:** In a seating area where no traffic passes behind a seated diner, allow 32 inches of clearance from the counter/table edge to any wall or other obstruction behind the seating area. If traffic passes behind the seated diner, allow at least 36 inches to edge past or at least 44 inches to walk past.
- 9. Seating Clearance:** Kitchen seating areas should incorporate at least the following clearances: At 30-inch-high tables/counters, allow a 24-inch-wide by 18-inch-deep knee space for each seated diner. At 36-inch-high counters, allow a 24-inch-wide by 15-inch-deep knee space. At 42-inch-high counters, allow a 24-inch-wide by 12-inch-deep knee space.
- 10. Cleanup/Prep Sink Placement:** If a kitchen has only one sink, locate it adjacent to or across from the cooking surface and refrigerator.
- 11. Cleanup/Prep Sink Landing Area:** Include at least a 24-inch-wide landing area to one side of the sink and at least an 18-inch-wide landing area on the other side.
- 12. Preparation/Work Area:** Include a section of continuous countertop at least 36 inches wide and 24 inches deep immediately next to a sink.
- 13. Dishwasher Placement:** Locate nearest edge of the primary dishwasher within 36 inches of the nearest edge of a sink. Provide at least 21 inches of standing space between the edge of the dishwasher and countertop frontage, appliances and/or cabinets placed at a right angle to the dishwasher.
- 14. Waste Receptacles:** Include at least two waste receptacles. Locate one near the sink(s) and a second for recycling in the kitchen or nearby.
- 15. Auxiliary Sink:** At least 3 inches of countertop frontage should be provided on one side of the auxiliary sink and 18 inches on the other side.

- 16. Refrigerator Landing Area:** Include at least 15 inches of landing area on the handle side of the refrigerator or 15 inches of landing area on either side of a side-by-side refrigerator or 15 inches of landing area no more than 48 inches across from the front of the refrigerator or 15 inches of landing area above or adjacent to any undercounter refrigeration appliance.
- 17. Cooking Surface Landing Area:** Include a minimum of 12 inches of landing area on one side of a cooking surface and 15 inches on the other side. In an island or peninsula, the countertop should also extend a minimum of 9 inches behind the cooking surface.
- 18. Cooking Surface Clearance:** Allow 24 inches of clearance between the cooking surface and a protected noncombustible surface [e.g., a range hood] above it. At least 30 inches of clearance is required between the cooking surface and an unprotected/combustible surface [e.g., cabinetry] above it. If a microwave hood is used, then the manufacturer's specifications should be followed.
- 19. Cooking Surface Ventilation:** Provide a correctly sized, ducted ventilation system for all cooking surface appliances; the recommended minimum is 150 CFM.
- 20. Cooking Surface Safety:** Do not locate the cooking surface under an operable window. Window treatments above the cooking surface should not use flammable materials. A fire extinguisher should be located near the exit of the kitchen away from cooking equipment.
- 21. Microwave Oven Placement:** The ideal location for the bottom of the microwave is 3 inches below the principle user's shoulder but no more than 54 inches above the floor. If the microwave is below the countertop the bottom must be at least 15 inches off the finished floor.
- 22. Microwave Landing Area:** Provide at least a 15-inch landing area above, below or adjacent to the handle side of a microwave.
- 23. Oven Landing Area:** Include at least a 15-inch landing area next to or above the oven. At least a 15-inch landing area not more than 48 inches across from the oven is acceptable if the appliance does not open into a walkway.
- 24. Combining Landing Areas:** If two landing areas are adjacent, determine a new minimum by taking the longer of the two landing area requirements and adding 12 inches.
- 25. Countertop Space:** A total of 158 inches of countertop frontage, 24 inches deep, with at least 15 inches of clearance above, is needed to accommodate all uses.
- 26. Countertop Edges:** Specify clipped or round corners rather than sharp edges.
- 27. Storage:** The total shelf/drawer frontage is: 1,400 inches for a small kitchen (150 square feet or less); 1,700 inches for a medium kitchen (151 to 350 square feet); and 2,000 inches for a large kitchen (351 square feet or more). *See Chart.
- 28. Storage at Cleanup/Prep Sink:** Of the total recommended shelf/drawer frontage, the following should be located within 72 inches of the centerline of the main cleanup/prep sink: at least 400 inches for a small kitchen; at least 480 inches for a medium kitchen; and at least 560 inches for a large kitchen.
- 29. Corner Cabinet Storage:** At least one corner cabinet should include a functional storage device. This does not apply if there are no corner cabinets.
- 30. Electrical Receptacles:** GFCI (ground fault circuit interrupter) protection is required on all receptacles servicing countertop surfaces.
- 31. Lighting:** Every work surface should be well-illuminated by appropriate task lighting.

	Small	Medium	Large
Wall	300 in.	360 in.	360 in.
Base	520 in.	615 in.	660 in.
Drawer	360 in.	400 in.	525 in.
Pantry	180 in.	230 in.	310 in.
Misc.	40 in.	95 in.	145 in.

INSTALLATION GUIDELINES

84" Top Alignment Cabinet Installation

- 84" top alignment cabinet installation includes standard Wall cabinets (30" high) installed 54" above the finished floor, allowing 18" clearance between the Wall cabinets and a standard countertop height of 36".
- Tall cabinetry (Linen, Pantry, Oven) is 84" high.
- When selecting cabinetry for installation above or near any appliance, refer to the appliance

90" Top Alignment Cabinet Installation

- 90" top alignment cabinet installation includes taller Wall cabinets (36" high) installed 54" above the finished floor, allowing 18" clearance between the Wall cabinets and a standard countertop height of 36".
- Tall cabinetry (Pantry, Oven) is 90" high.
- When selecting cabinetry for installation above or near any appliance, refer to the appliance manufacturer's specifications for clearance and venting requirements.

96" Top Alignment Cabinet Installation

- 96" top alignment cabinet installation includes full-height Wall cabinets (42" high) installed 54" above the finished floor, allowing 18" clearance between the Wall cabinets and a standard countertop height of 36".
- Tall cabinetry (Pantry, Oven) is 96" high.
- When selecting cabinetry for installation above or near any appliance, refer to the appliance manufacturer's specifications for clearance and venting requirements.

How to Read a Cabinet Product Code

Wall Cabinets

Wall cabinets are listed by item code, width and height. Thus the first number 24 is the width and the second number 30 is the height. The third number is the depth. The standard depth of a wall cabinet is 12" deep and therefore is not listed in the code.

W2430

W361224

Base Cabinets

The standard height of a base cabinet is 34 1/2" and the depth 24". Base cabinets are listed by item code and width only, thus the 24 in this example is the width.

B24

DB24-3

Tall Cabinets

The tall cabinet width is always listed first and height is always the last two numbers. Thus 24" is the width and 90" is the height. Since most tall cabinets are 24" deep we only list the cabinet depth when it is not 24" as in the following example.

WP2490

The depth of the cabinet is 18" and this number follows the width 24" and the height 90". When the depth is not 24" deep it will always be the last two numbers as in the following example.

WP249018

WOOD CABINET SURFACES

As with all wood products, avoid excessive moisture. Jarlin cabinetry is designed for use inside the home or other buildings and is not intended for outdoor applications. Once your cabinets have been installed, wipe down all exteriors with a damp cloth to remove dust. Complete a small area at a time and wipe dry.

Cleaning Agents

Use a damp cloth when cleaning normal household spills. After wiping thoroughly, dry the surface with a lint-free cotton cloth. For stubborn stains, it may be necessary to use a mild detergent with warm water. Always dry the surface immediately. Never use abrasive cleaners, scouring pads or powdered cleansers. Do not allow oven cleaner to touch any part of the cabinet.

Everyday Care

It is important to wipe up spills and water marks as they occur. Give special attention to areas around the sink and dishwasher. Avoid draping damp or wet dish towels over the door of the sink base cabinet. Over time, this moisture can cause permanent water damage to the door.

Scratches, Gouges, & Nicks

A Touch-Up Kit is available to hide surface damage. Contact Jarlin Cabinetry to purchase the color-matched touch-up kit for your specific cabinets. Use the kit's touch-up pen to hide minor blemishes. Use the kits tinted putty to fill deeper scratches, gouges, or nicks. Detailed instructions are provided in each kit.

Avoid Light Damage

Exposure to direct sunlight tends to darken the color of natural wood products. Sunlight can also fade painted wood surfaces. Consider the use of draperies or blinds to protect your cabinets from direct sunlight. Please be aware that natural light and fluorescent light will fade the finish from its original color.

Avoid Heat Damage

The heat generated when using an oven's self-cleaning feature is much greater than during normal cooking. If this heat escapes from the oven, it can damage your cabinets. While this is a rare circumstance, you can minimize the risk of cabinet damage by opening cabinet door and drawers nearest the oven before using its self-cleaning feature.

Waxing & Polishing

Waxing is not recommended. Over time, waxing and polishing compounds may build up on the surface of your cabinet causing hazy, streaky, or a yellowed appearance to your cabinets finish.

Cleaning Glass Doors

Extra care is required when cleaning glass doors. Spray an ammonia-free glass cleaner on a clean cotton cloth or paper towel. Do not spray cleaner directly on the glass. The spray could run or seep behind the frame or mullions and cause damage.

POLICIES & GENERAL INFORMATION

Freight Policy

If an entire order is no charge, Jarlin Cabinetry will pay for standard ground freight.

If an order contains a chargeable item, the cost of freight will be charged to the customer's invoice.

If a customer requests an upgrade to a parcel shipment method, the customer will be charged the entire freight charge.

Returned Goods Policy

Customized, assembled & installed products cannot be returned.

All returns will be subject to a 15% restocking fee. Jarlin Cabinetry reserves the right to deny any returns deemed unacceptable.

No returns will be accepted after (30) calendar days from the date of purchase.

Returned products will be inspected prior to acceptance by Jarlin Cabinetry.

Upon acceptance of order and completion of the shipment or pick-up, all materials are the responsibility of the customer.

The customer must provide the reason for the return prior to Jarlin Cabinetry's acceptance of the returned product.

All returned products must be accompanied by the original written and signed contract or invoice receipt provided at time of purchase.

Transportation Policy

The responsibility of Jarlin Cabinetry ceases upon delivery of product in good working order to transport companies and all product(s) are shipped at consignee's risk.

Please inspect all product(s) at time of signing freight bill, and have transportation company note any damage incurred in transit. Do not sign for any damaged product(s).

All prices are (F.O.B.) point of manufacture or warehouse.

Quotation Of Price

All written quotations of price ("Quote") made by Jarlin Cabinetry will be valid for a period of thirty (30) days, without exception, from the date of the Quote generated by Jarlin Cabinetry. Jarlin Cabinetry under any circumstance will not honor verbal quotations of price.

Change Orders

A twenty-five dollar (\$25), non-refundable service fee will be charged to Buyer for each occurrence of changing an order .

Financial Responsibility

Jarlin Cabinetry requires payment of invoices upon receipt of goods.

Storage Fees

Purchased items not picked up by Buyer within five (5) business days after Buyer receives Ready for Pickup notification are subject to storage fees, including, but not limited to a daily fee of fifty dollars (\$50) for items stored at Jarlin Cabinetry.

Shipment And Claim Of Damage

In case of claiming damage and loss in transit for any delivery of FOB, it's Buyer's responsibility to claim through the freight broker once the products leaves Jarlin Cabinetry's warehouses. Please refer to Jarlin Cabinetry Transportation Policy and the freight company's claim policies and procedures.

Taxes

All sales tax, excise taxes, or other forms of taxes levied against this transaction shall be paid by Buyer over and above all other sums Buyer is or may become obligated to pay hereunder. These taxes are in addition to the purchase price of the products subject to an order. If you are exempt from tax, an original signed tax exemption certificate must be submitted to Jarlin Cabinetry. Without a valid signed tax exemption certificate on file at Jarlin Cabinetry all applicable taxes will be charged to the Buyer.

Governing Law; Venue And Jurisdiction

All issues concerning the formation, performance, or interpretation of any contract regarding this sale shall be governed by the laws of the state of Florida, and any dispute between Jarlin Cabinetry and Buyer will be resolved in Florida the prevailing party in that dispute entitled to its costs and reasonable attorneys fees.

Severability Of Terms

If any phrase, clause or provision shall be declared void, the validity of any other provisions shall not be affected there

THREE YEARS LIMITED WARRANTY

Jarlin Cabinetry warrants to original consumer purchase(s) for a period of three years from the original date of purchase that all other components of Jarlin Cabinetry shall be free from defects in material and workmanship under normal use.

Jarlin Cabinetry warrants to original consumer purchaser(s) for as long as they own their home that the drawer box, drawer glides, and hinges used in the manufacture of Jarlin Cabinetry products shall be free from defects in material and workmanship under normal use.

These warranties are only applicable to products used in residential applications within the United States and are non-transferable to subsequent owners.

Should defects in material or workmanship exist during the applicable warranty period in any Jarlin Cabinetry will elect at its discretion to either repair or replace the defective material or component free of charge. This warranty covers only parts and materials of the products supplied by Jarlin Cabinetry. Not covered under this warranty are countertops, appliances, plumbing fixtures, etc. or the costs, including labor, to remove and reinstall materials and related components such as fixtures, appliances, etc...

This warranty shall become void if the cabinets are in any way modified, improperly installed, or damaged prior to or during the installation. This also disclaims products utilized in any application other than the standard. Furthermore, this warranty will not apply to cabinets damaged by misuse, neglect, abuse, acts of God, exposure to moisture, exposure to extreme temperatures or the effects of normal wear and tear.

Natural woods vary in color, characteristics, and exhibit subtle changes as they age. For example, wood joints may eventually have visible cracking around the joint area and cabinet color may darken or lighten over time.

Sunlight, smoke, household cleaners, and other environmental conditions may also affect the color match over time. These variations are considered to be the nature of the material in relation to their environment exposure and are not covered under this warranty.

Jarlin Cabinetry reserves the right to alter design, specifications and material without obligation to make similar changes to products previously manufactured.

The repair(s) or replacement(s) are contingent upon the current product offerings of style and construction options within the Jarlin Cabinetry product at the time of the warranty claim. If a warranty claim is filed after an Jarlin Cabinetry product becomes obsolete, Jarlin Cabinetry reserves the right to honor the warranty in one of the following fashions:

- 1)** To replace the affected component with a new component with a new component of the same style.
- 2)** To replace the affected component and any other component(s) in the residential application to achieve a uniform appearance with a similar and comparable and comparable product style of the originally purchased style.

If components are replaced, Jarlin Cabinetry cannot guarantee that the finish of these replacement(s) will exactly match the finish and appearance of the components in the residential application. This is due to the changes that occur during woods natural aging process, affecting its color and grain.

THIS WARRANTY IS THE EXCLUSIVE WARRANTY OF JARLIN CABINETRY AND IS IN LIEU OF ALL OTHER WARRANTIES, EXPRESSED OR IMPLIED, INCLUDING THE IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

This warranty gives you specific legal rights and you may have other rights, which vary from state to state. Some states do not allow the exclusion of limitation or consequential damages, so the above limitations or exclusions may not apply to you.

To obtain replacement(s) under Jarlin Cabinetry's Three Year Limited warranties, take some clear pictures of part that need to be replaced and Email it to sales@jarlincabinetry.com. A dated sales receipt as proof of purchase is required to obtain benefits from this warranty.
